## **Michigan Association of Health Plans applauds selection of Olga Dazzo for Department of Community Health director**

The following statement can be attributed to Michigan Association of Health Plans Executive Director Rick Murdock

"MAHP congratulates the Snyder Administration for making an outstanding appointment to one of the key positions in state government and to bring back a Director who has Michigan experience.

Olga Dazzo has long experience working in health systems, health plans, private consulting. She has an uncanny ability to see issues from all points of view while maintaining focus on the improving health care in the most efficient way possible.

She has been a leader in Michigan in developing and promoting accountable health care for our Medicaid program and holding Medicaid health plans to the highest standard possible. Her advocacy and the work of others has paid off. Michigan today has 12 of the top 50 Medicaid plans in the United States as ranked by National Center for Quality Assurance.

Olga's focus has always been on outcomes and their objective measurement. She is known for her use of charts and graphs to measure progress and compare performance. We expect that focus to continue as Director of the Department of Community Health

MAHP stands ready to support Olga in her new challenge as director, and the Snyder Administration, as we move forward creating a healthier Michigan for all citizens."
